## Westside Community Schools 2019-20 Demographic and Statistical Profile

### Summary

The Westside Community Schools' official K-12 enrollment for 2019-20 is 5,930—an increase of 2.19 percent from the previous year.

The diversity of the District's student population continues to increase, as it has for nearly two decades. In 2000-01, approximately 90 percent of Westside students identified themselves as White; in 2019-20, that number stands at 70 percent. Likewise, socioeconomic diversity has increased in the same period, with the percentage of students qualifying for free or reduced-price meals rising from roughly 23 percent of enrollment in 2007-08 to 33 percent this year.

Other highlights:

- Students qualifying for special education services account for 15.5 percent of the student population. That figure has remained in the 13.4 to 14.0 percent range for eight consecutive years, this is a slight increase.
- English Language Learner enrollment remained fairly steady, increasing slightly from 2.2 to 2.5 percent of total enrollment.
- Parents submitted over 550 applications on behalf of prospective students seeking admission to Westside schools under the State of Nebraska Enrollment Option program for 2019-20.
- Students enrolled through the Option program represent 35 percent of the District's total enrollment. That percentage is an increase from last years.

As in the previous two years, we began including an additional page listing absenteeism rates for each school. Students are considered chronically absent when they miss more than ten percent of days that school is in session. Ten percent of the District's 179-day calendar is 18 days, and while that number may seem high, it averages out to just two days per month. Researchers have established a strong link between students who are chronically absent— particularly in grades K-3—and significant deficits in both reading and math skills compared to their peers who have strong attendance. Furthermore, ground lost in these early years is ground that chronically absent students never make up, increasing their learning difficulties in later elementary, middle, and high school years. Because reducing chronic attendance is a key ingredient for student success, this document now tracks absenteeism rates, using attendance data from the preceding school year.

•

### About the Numbers

October 1 is the new official collection date for fall reports to the Nebraska Department of Education. All data contained in this document are based on the October 1 collection data and derived from those fall reports—most often the October Snapshot or Special Education Snapshot. If some figures appear to conflict, it is likely because some totals are calculated differently to include different combinations of students, depending on the report; in those cases, we have used an asterisk to identify and explain those conflicts. Finally, in some instances, percentages may total slightly higher or lower than 100, due to rounding.
